

ORAL PRESENTATIONS

For those of you presenting orally at ICUIL, the meeting room is equipped with both an overhead projector and a 1024 by 768 resolution, high brightness LCD projector. We recommend and encourage computer presentation of materials at ICUIL 2004. We also recommend that you bring your own computer, however, if needed, both Macintosh and PC platforms can be made available. At the podium area there will be 4 VGA connectors for the LCD projector and a VGA switch. We will be requesting that speakers for each session connect their computers prior to that session and verify at that time that their presentation displays properly. 110V power outlets will be available at the VGA connector location if you wish to run your laptop computer from line power vs. battery power. You will need to bring your own plug adapters. Please be sure to allow at least 5 minutes for questions at the end of your presentation.

POSTER PRESENTATIONS.

For those of you presenting posters at the Thursday poster session, the area available for each poster is 4 feet by 8 feet. The poster session will be catered and followed by the conference barbeque.
